3 SIGNIFICANT ACCOUNTING POLICIES

3.01 Property, Plant and Equipment

Tangible Assets are stated at cost net of recoverable taxes, trade discounts and rebates and include amounts added on revaluation, less accumulated depreciation and impairment loss, if any. The cost of tangible assets comprises its purchase price, borrowing cost and any cost directly attributable to bringing the asset to its working condition for its intended use, net charges on foreign exchange contracts and adjustments arising from exchange rate variations attributable to the assets.

Subsequent expenditures related to an item of Tangible Asset are added to its book value, only if they increase the future benefits from the existing asset beyond its previously assessed standard of performance.

Assets which are not ready for their intended use are disclosed under Capital Work-in- Progress and all the cost relating to such assets are shown under work-in-progress

Depreciation / amortisation

In respect of fixed assets (other than freehold land and capital work-in-progress) acquired during the year, depreciation/amortisation is charged on a straight line basis so as to write-off the cost of the assets over the useful lives.

Type of Assets	Period
Buildings	30 Years
Plant and Equipment	15 Years
Furniture and Fixtures	10 Years
Vehicles	8 Years
Office equipment	5 Years
Computers	4 Years

Impairment

The Management periodically assesses, using external and internal sources, whether there is an indication that an asset may be impaired. An impairment loss is recognized wherever the carrying value of an asset exceeds its recoverable amount. The recoverable amount is higher of the asset's net selling price and value in use, which means the present value of future cash flows expected to arise from the continuing use of the asset and its eventual disposal. An impairment loss for an asset is reversed if, and only if, the reversal can be related objectively to an event occurring after the impairment loss was recognized. The carrying amount of an asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined (net of any accumulated amortization or depreciation) had no impairment loss been recognized for the asset in prior years

3.02 Leases

Assets taken on lease by the Company in its capacity as lessee, where the Company has substantially all the risks and rewards of ownership are classified as finance lease. Such a lease is capitalised at the inception of the lease at lower of the fair value or the present value of the minimum lease payments and a liability is recognised for an equivalent amount. Each lease rental paid is allocated between the liability and the interest cost so as to obtain a constant periodic rate of interest on the outstanding liability for each year.

Lease arrangements where the risks and rewards incidental to ownership of an asset substantially vest with the lessor, are recognised as operating leases. Lease rentals under operating leases are recognised in the statement of profit and loss on a straight-line basis.

3.03 Investments

Long-term investments and current maturities of long-term investments are stated at cost, less provision for other than temporary diminution in value. Current investments, except for current maturities of long-term investments, comprising investments in mutual funds, government securities and bonds are stated at the lower of cost and fair value.

Investments which are readily realizable and intended for not more than one year from the date on which such investments are made, are classified as current investments. All other investments are classified as long term investments.

3.04 Revenue recognition

Revenue is recognised to the extent that it is probable that, the economic benefits will flow to the Company and the revenue can be reliably estimated and collectability is reasonably assured.

Revenue from sale of goods is recognised when control of the products being sold is transferred to our customer and when there are no longer any unfulfilled obligations. The performance Obligations in our contracts are fulfilled at the time of dispatch, delivery to upon formal customer acceptance depending on customer terms.

Revenue is measured on the basis of sale price, after deduction of any trade discounts, volume rebates and any taxes or duties collected on behalf of the Government such as goods and services tax, etc. Accumulated experience is used to estimate the provision for such discounts and rebates. Revenue is only recognised to the extent that it is highly probable a significant reversal will not occur.

Dividend Income

Dividends is recognised when the Company's right to receive the payment is established, which is generally when shareholders approve the dividend declaration.

Interest Income

Interest income is recognised on a time proportion basis as and when accrued.

3.05 Taxation

Current income tax expense comprises taxes on income from operations in India and in foreign jurisdictions. Income tax payable in India is determined in accordance with the provisions of the Income Tax Act, 1961. Tax expense relating to foreign operations is determined in accordance with tax laws applicable in countries where such operations are domiciled.

Minimum Alternative Tax (MAT) paid in accordance with the tax laws in India, which gives rise to future economic benefits in the form of adjustment of future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal income tax after the tax holiday period. Accordingly, MAT is recognised as an asset in the balance sheet when the asset can be measured reliably and it is probable that the future economic benefit associated with it will fructify.

Deferred tax expense or benefit is recognised on timing differences being the difference between taxable income and accounting income that originate in one period and is likely to reverse in one or more subsequent periods. Deferred tax assets and liabilities are measured using the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date. The Company offsets deferred tax assets and deferred tax liabilities if it has a legally enforceable right and these relate to taxes on income levied by the same governing taxation laws.

Advance taxes and provisions for current income taxes are presented in the balance sheet after off-setting advance tax paid and income tax provision arising in the same tax jurisdiction for relevant tax paying units and where the Company is able to and intends to settle the asset and liability on a net basis.

3.06 Foreign currency transactions

Initial recognition:

Transactions in foreign currencies entered into by the Company are accounted at the exchange rates prevailing on the date of the transaction or at rates that closely approximate the rate at the date of the transaction.

Measurement of foreign currency monetary items at the Balance Sheet date:

Foreign currency monetary items (other than derivative contracts) of the Company outstanding at the Balance Sheet date are restated at the year-end rates.

Treatment of exchange differences:

Exchange differences arising on settlement / restatement of short-term foreign currency monetary assets and liabilities of the Company are recognized as income or expense in the Statement of Profit and Loss.

3.07 Inventories

Raw materials are carried at the lower of cost and net realisable value. Cost is determined on a weighted average basis. Purchased goods-in-transit are carried at cost. Work-in-progress is carried at the lower of cost and net realisable value. Stores and spare parts are carried at lower of cost and net realisable value. Finished goods produced or purchased by the Company are carried at lower of cost and net realisable value. Cost includes direct material and labour cost and a proportion of manufacturing overheads.

3.08 Provisions, Contingent liabilities and Contingent assets

(a) Provisions

Provision is recognized when the company has present obligations as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligations and reliable estimate can be made of amount of the obligation. Provisions are not discounted at their present value and are determined based on the best estimate required to settle the obligation at the reporting date. These estimates are reviewed at each reporting date and adjusted to reflect the current best estimates.

(b) Contingent Liabilities

Contingent liability is a possible obligation that arises from the past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is liability that cannot be recognized because it cannot be measured reliably. The company does not recognize a contingent liability but discloses its existence in the financial statements.

3.09 Employee Benefits

a) Short Term Employee Benefits

Short-term employee benefit obligations are measured on an undiscounted basis and are recorded as expense as the related service is provided. Benefits such as salaries, Leave Travel Allowance, short term compensated absences etc., and the expected cost of bonus is recognized in the period in which the employee renders the related services. A liability is recognised for the amount expected to be paid under short-term cash bonus or profit-sharing plans, if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

Biju

Devi

Devi

b) Post-Employment Benefits

The Company participates in various employee benefit plans. Pensions and other post-employment benefits are classified as either defined contribution plans or defined benefit plans. Under a defined contribution plan, the Company's only obligation is to pay a fixed amount with no obligation to pay further contributions if the fund does not hold sufficient assets to pay all employee benefits. The related actuarial and investment risks are borne by the employee. The expenditure for defined contribution plans is recognised as an expense during the period when the employee provides service. Under a defined benefit plan, it is the Company's obligation to provide agreed benefits to the employees. The related actuarial and investment risks are borne by the Company. The present value of the defined benefit obligations is calculated by an independent actuary using the projected unit credit method.

Defined contribution plans

The Company has defined contribution plans (where Company pays pre-defined amounts and does not have any legal or informal obligation to pay additional sums) for post-employment benefits and the company's contributions thereto are charged to Profit and Loss statement every year. The company's contributions to State plans (viz., Employees Provident Fund and Employee Pension Scheme) are also charged to Profit and Loss Statement as expense during the period in which the employees perform the service.

Defined Benefit plans

Gratuity:

The company's contribution to Gratuity is not made to any approved funds. The present value of the obligation for gratuity benefits as determined on independent actuarial valuation, conducted annually using the projected unit credit method, as adjusted for unrecognized past services cost if any and as reduced by the fair value of plan assets, is recognized in the accounts. Actuarial gains and losses are recognized in full as employee benefit expense in the Profit and Loss Statement for the period in which they occur.

3.10 Cash and cash equivalents

The Company considers all highly liquid financial instruments, which are readily convertible into known amount of cash that are subject to an insignificant risk of change in value and having original maturities of three months or less from the date of purchase, to be cash equivalents.

3.11 Earnings per Share

The Company presents basic and diluted earnings per share data for its equity shares. Basic and diluted earnings per share is calculated by dividing the profit or loss attributable to owners of the equity shares of the Holding Company by the weighted average number of equity shares outstanding during the year.

Note:-

On July 19, 2024, the Board of Directors approved and allotted bonus shares in the ratio of 10:1 to existing shareholders as of the record date, July 18, 2024.

Accordingly, the issued, subscribed, and paid-up capital rose from 6.25,000 equity shares of ₹10 each to 68,75,000 equity shares of ₹10 each.

EBITDA Margin = EBITDA/Total Revenue from Operations

Earnings per share (₹) = Profit available to equity shareholders / Weighted No. of shares outstanding at the end of the year

Earnings Per Share calculation are in accordance with Accounting Standard 20- Earnings Per Share, notified under the Companies (Accounting Standards) Rules 2021, and as amended from time to time.

Return on Net worth (%) = Restated Profit after taxation / Net worth x 100

Net Worth = Equity Share Capital + Reserve and Surplus (including P&L surplus) - Revaluation Reserve, If any

Net asset value/Book value per share (₹) = Net worth / No. of equity shares outstanding at the end of FY

The Company does not have any revaluation reserves or extra-ordinary items.
